

PRECISION. REDEFINED.

Pioneering the next generation of filtration technology,
advanced pleating systems, and industrial automation since
1970.

Empowering global filter manufacturing since 1970.

Dashmesh International is a leading manufacturer of advanced filtration machinery, industrial ovens, and precision-engineered production systems. Every machine reflects over five decades of engineering expertise.

50+

YEARS OF EXCELLENCE

10+

COUNTRIES REACHED

Pleating Machines & Accessories

01

D.I. Blade Type Pleating Machine

High-efficiency blade type pleating machine for flexible and precise pleat formation.

D.I. Rotary Marathon Pleater

High-output rotary pleating machine for precision automotive and industrial filter pleating.

D.I. Rotary Pleater With Side Lock

Precision rotary pleater with side lock mechanism for industrial filter pleating.

D.I. Fabric Pleating Machine

High-speed fabric pleating machine for uniform and adjustable pleat formation.

Pleating Machines & Accessories (Cont.)

01

D.I. Rotary Pleater Head

Interchangeable rotary pleater head for precision pleating operations.

D.I. Polynet Mesh Pleating Machine

Blade-type pleating machine optimized for polynet and mesh filter media.

D.I. Pleating Machine (with Inline Slitter)

Advanced blade-type pleating machine with integrated inline slitter for simultaneous filter media cutting and pleating in a single pass.

D.I. C.A.V. Filter Making Machine

Custom-built C.A.V. filter making machine with manual or PLC control options.

D.I. Yarn Filter Making Machine

Machine for manufacturing yarn-wound (string wound) filter cartridges with consistent winding.

D.I. Diesel Filter Paper Machine

Machine for processing and forming high-density diesel filter paper media.

D.I. Air Filter Testing Rig

Custom-built air filter testing rig for performance evaluation under controlled conditions.

D.I. Spin-On Leak Test Rigs

Manual spin-on leak test rig for accurate inspection of filter integrity.

D.I. Oil Filter Testing Rig

Automatic oil filter testing rig for performance and durability evaluation.

D.I. Fuel Filter Testing Rig

Automatic fuel filter testing rig for accurate performance evaluation of diesel fuel filters.

Testing & Inspection Equipment (Cont.)

03

D.I. Gas Turbine Test Rig

High-accuracy gas turbine test rig for industrial testing and calibration.

D.I. Filter Testing Machine

Industrial filter testing machine for efficiency and quality evaluation.

D.I. Spin-On Filter Impulse Testing Machine

Impulse testing machine for evaluating durability and performance of spin-on filters.

D.I. Micron Testing Equipment

Precision equipment for micron rating and pore size analysis of filter media.

D.I. Paper Burst Testing Machine

Compact paper burst testing machine for accurate strength evaluation.

D.I. P.V.C Adhesive Pre-curing Oven

Custom-built industrial oven for pre-curing PVC adhesive applications.

D.I. Box Type Curing Oven

Custom-built box type curing oven for batch industrial curing applications.

D.I. Filter Paper Conveyorised Oven

Custom-built conveyorised oven for continuous filter paper drying and curing.

D.I. Adhesive Curing Oven

Custom-built adhesive pre-curing oven for PVC-based industrial applications.

D.I. Industrial Drying Oven

Custom-built industrial drying oven for uniform and efficient moisture removal.

D.I. Curing Oven Conveyor

Custom-built conveyorised curing oven for continuous industrial processes.

D.I. Box Type Tray Dryer (Multiple Use)

Custom-built box type tray dryer for versatile industrial drying applications.

D.I. Electric Oven

Custom-built electric oven for efficient and reliable industrial heating applications.

D.I. Furnace Lab Oven

Precision-engineered laboratory oven for testing, curing, and analysis applications.

D.I. P.U Filter Curing Tunnel Conveyor

Heat-resistant conveyor system for PU filter curing tunnel applications.

D.I. GT Filter Assembly Conveyor

Custom-built conveyor system for GT filter assembly line operations.

D.I. Inclined Conveyor Belt

Custom-built inclined conveyor belt for efficient elevation-based material handling.

D.I. Flat Conveyor Belt

Custom-built flat conveyor belt system for smooth horizontal material movement.

D.I. On-Line Paper Slitting Machine

Heavy-duty on-line slitting machine for accurate paper roll processing.

D.I. Filter Paper Slitting Machine

High-performance slitting machine for precision cutting of filter paper rolls.

D.I. Perforation Machine

Heavy-duty perforation machine for precision punching and slotting of metal sheets.

D.I. Sheet Perforation Machine

Precision sheet perforation machine for coil and sheet metal applications.

D.I. Sheet Expanded Metal Machine

Industrial machine for producing expanded metal sheets with uniform mesh structure.

D.I. E Metal Sheet Flattening Machine

Industrial flattening machine for straightening expanded and metal sheets.

D.I. Tube Rolling Machine

Industrial tube rolling machine for accurate and consistent forming of metal tubes.

D.I. Hydro Pneumatic Press

Industrial hydro-pneumatic press for accurate and high-output pressing operations.

D.I. HI-Tech Hydro Press Digital Model

Digitally controlled hydro press for high-precision industrial pressing applications.

D.I. Shock Absorber Seaming Machine

Heavy-duty seaming machine for leak-resistant assembly of shock absorbers.

D.I. Spot Welding M/C

Industrial spot welding machine for accurate and high-strength metal joining.

D.I. Seaming Machine

Industrial seaming machine for reliable and high-strength joint formation.

D.I. PLC Programming Display

Industrial HMI display for PLC programming, monitoring, and control.

D.I. A.C Drive

Industrial AC Drive (VFD) for efficient motor speed and torque control.

D.I. Servo System

Advanced servo drive system for precise motion control.

D.I. PID Control

Industrial PID controller for accurate closed-loop process control.

D.I. Aluminium Foil Pleated Rotary Type

Rotary pleating machine for precision forming of aluminium foil media.

D.I. Clean Room HEPA Filter Pleating Machine

High-precision pleating system engineered for clean room and high-efficiency filtration applications.

D.I. Hepa Filter Making Machine

High-precision machine for manufacturing HEPA and high-efficiency filter elements.

D.I. Base Paper (Filter) Impregnation Coating Plant

Custom-built impregnation coating plant for manufacturing air, oil, and fuel filter paper.

D.I. Conveyor Type Hot Plate

Conveyor-based hot plate system for continuous and uniform industrial heating applications.

D.I. Filter End Cap Hot Plate

Heavy-duty hot plate system for welding filter end caps and embedding filter media.

D.I. PVC Adhesive Dispenser

Industrial PVC adhesive dispensing unit for controlled and continuous application.

D.I. PVC Adhesive Dispenser

High-efficiency PVC adhesive dispensing system for industrial bonding applications.

D.I. Industrial Paint Booth

Pollution-free industrial paint booth for spray painting and baking applications.
